

VoiceSync Studio — Terms & Conditions and User Guide

Oct 8, 2026 · @Saad

Part A: Terms & Conditions

By using VoiceSync Studio you agree to these Terms. If you do not agree, do not use the service. Replace every [bracketed] item before publishing, and have a Pakistani lawyer review the final text.

1. Acceptance and changes

1. These Terms form a binding agreement between you and [Owner / Company Name] ("we", "us"), the operator of VoiceSync Studio at mainsaad276-jpg.github.io/voicesync-studio and any related apps (the "Service").
2. We may update these Terms at any time. The "Last updated" date at the top shows the current version.
3. Continued use after an update means you accept the new Terms. For major changes we will show a notice on the site.

2. What the Service does

VoiceSync Studio converts text into speech (voiceover), offers lip-sync of audio to video or images, and provides voice cloning as a premium feature.

- **Free features:** text-to-speech in 60+ languages, character voices, browser (offline) voices, MP3 download.
- **Premium features:** voice cloning and any feature marked "Premium" in the app.
- Free features need no API key. Some features rely on third-party speech engines or your browser's built-in voices, so quality and availability can vary.

3. Eligibility

1. You must be at least 18 years old, or 13+ with permission and supervision of a parent or guardian.
2. Voice cloning is available only to users aged 18 or older.

3. If you use the Service for a business, you confirm you are authorised to accept these Terms on its behalf.

4. Accounts

1. Some features may require an account. Give accurate information and keep your password private.
2. You are responsible for all activity under your account.
3. Tell us immediately at [support email] if you suspect unauthorised access.
4. One person may not create multiple free accounts to avoid usage limits.

5. Acceptable use

You may use the Service for lawful purposes such as content creation, education, news narration, accessibility and business ads.

You must not use the Service to create or share audio or video that:

- Impersonates a real person to deceive, defraud or harass anyone.
- Spreads fake news, false statements attributed to real people, or election misinformation.
- Is hateful, threatening, sexually explicit, or targets children in any way.
- Defames a person or violates their privacy.
- Supports scams, fake calls, fake customer support or financial fraud.
- Infringes copyright, for example narrating a full copyrighted book you have no rights to.
- Breaks any law of Pakistan, including the Prevention of Electronic Crimes Act 2016 (PECA), or the laws of your own country.

You also must not hack, overload, scrape or reverse-engineer the Service, or bypass its usage limits.

6. Voice cloning consent policy

Voice cloning is allowed only with clear consent. This rule has no exceptions.

1. You may clone **only your own voice**, or the voice of a person who has given you explicit, written permission.
2. Before cloning, you must confirm consent in the app. We may ask you to record a consent statement in the same voice.
3. Cloning voices of public figures, politicians, religious scholars, celebrities, or anyone who has not consented is strictly prohibited.

4. You may not clone the voice of a minor.
5. The person whose voice was cloned may ask us to delete that voice model at any time by writing to [support email].
6. We may add an inaudible watermark or label to cloned audio to identify it as AI-generated.
7. Breaking this policy leads to immediate account termination. We may report serious misuse to the relevant authorities.

7. Labelling AI content

When you publish AI-generated voice, especially in news or ads, we recommend a clear note such as "AI voiceover". Do not present cloned audio as a real recording of a person.

8. Ownership and rights

1. **Your text:** you keep all rights to the scripts you type or paste.
2. **Your output:** subject to these Terms, you may use the audio and video you generate for personal and commercial purposes, including YouTube, social media and ads.
3. **Our platform:** the VoiceSync Studio name, logo, design, code and voice models belong to us. You may not copy or resell them.
4. **Third-party voices:** some voices come from third-party or browser engines. Their own licence terms may also apply.
5. You give us a limited licence to process your text, audio and uploads only to provide the Service.

9. Free and Premium plans

Item	Free	Premium
Text-to-speech, 60+ languages	Yes	Yes
Character voices	Yes	Yes, plus extra voices
MP3 download	Yes	Yes, higher quality
Lip-sync	[Limited / Yes]	Yes
Voice cloning	No	Yes
Daily limit	[e.g. X characters]	[Higher / unlimited]
Price	PKR 0	[PKR ___ per month]

We may change features, limits or prices with notice. Free features may be limited or paused if usage becomes too high.

10. Payments and refunds

1. Premium is billed in advance [monthly / yearly] through [JazzCash / Easypaisa / bank transfer / card].
2. Subscriptions renew automatically unless cancelled before the renewal date.
3. You can cancel anytime. Access continues until the end of the paid period.
4. Refunds are given only if a paid feature did not work because of our fault and we could not fix it within [7] days. Request at [support email] within [14] days of payment.
5. No refund is given for accounts terminated for breaking these Terms.

11. Privacy and data

1. **What we collect:** account details (name, email), text you enter, voice samples and uploads, basic usage and device data.
2. **Why:** to generate your audio, run premium features, prevent misuse and improve the Service.
3. **Offline engine:** when you use browser voices, your text is processed on your own device and is not sent to us.
4. **Voice samples:** stored securely and used only to create your voice model. They are never sold or used to train public voices without your separate consent.

5. **Retention:** generated files are kept for [30] days, then deleted. Voice models are kept until you delete them or close your account.
6. **Your rights:** you can request a copy of your data, or its deletion, at [support email].
7. We never sell your personal data. We share it only with service providers who help run the Service, or when the law requires.

12. Disclaimers

1. The Service is provided "as is" and "as available".
2. We do not guarantee perfect pronunciation, accuracy, or uninterrupted availability, especially for regional languages.
3. Check your output before publishing. You are responsible for how you use it.

13. Limitation of liability

1. To the extent the law allows, we are not liable for indirect or consequential losses, lost profits or lost data.
2. Our total liability is limited to the amount you paid us in the 3 months before the claim, or PKR [1,000] for free users.
3. You agree to compensate us for claims caused by your misuse of the Service, including cloning a voice without consent.

14. Suspension and termination

1. You may stop using the Service and delete your account at any time.
2. We may suspend or close accounts that break these Terms, without prior notice in serious cases.
3. Sections on ownership, liability and governing law continue after termination.

15. Governing law and disputes

1. These Terms are governed by the laws of the Islamic Republic of Pakistan.
2. We will first try to resolve any dispute informally within 30 days.
3. If unresolved, the courts of [City], Pakistan will have exclusive jurisdiction.

16. Contact

- Operator: [Owner / Company Name]

- Email: [support email]
- Address: [Office address], Pakistan
- Report misuse: [abuse email or form link]

Part B: User Guide Book

VoiceSync Studio turns any script into a natural voiceover in under a minute, free, with no sign-up or API key for basic use.

1. Getting started

1. Open mainsaad276-jpg.github.io/voicesync-studio in Chrome, Edge or Firefox. Chrome on desktop gives the best results.
2. No installation is needed. It also works on mobile browsers.
3. Choose the interface language from the top-right menu (English or Urdu).
4. Turn on **Easy Mode** if you are new. It hides advanced settings and shows only the basic steps.

2. Interface tour

Area	What it does
Feature badges	Free Voices, No API Key, MP3 Download, 60+ Languages, Voice Cloning (Premium)
Your Text	Box where you type or paste your script
Language	Search or tap a language: Urdu, Hindi, English US/UK, Arabic, Spanish, French, Russian and more
Browser Voice	Voices installed on your device, used by the offline engine
Character Voices	Ready-made named voices such as Ahmed, Priya, Ivan, Natasha
Easy Mode	Simplified layout for beginners
Language menu (top right)	Changes the app's own language

3. Easy Mode vs Advanced

- **Easy Mode:** type text, pick a voice, press generate. Best for students and first-time users.
- **Advanced:** control speed, pitch, pauses and engine choice. Best for YouTubers and professional voiceovers.

4. Make your first voiceover

1. **Write the script** in the "Your Text" box. Type or paste up to [X] characters.
2. **Pick a language.** Tap a chip such as Urdu, or type in the search box.
3. **Choose a voice.** Select a Character Voice, or a Browser Voice for offline use.
4. **Adjust settings** (Advanced only): speed, pitch and pauses.
5. **Press Preview** to listen.
6. **Fix and repeat** until it sounds right.
7. **Press Download MP3** to save the file.

5. Languages

- 60+ languages are supported. Popular ones appear as quick chips.
- Urdu and Arabic text is written right to left automatically.
- Match the voice to the language. An English voice reading Urdu text will sound wrong.
- English (US) and English (UK) have different accents. Choose based on your audience.

6. Character Voices

- Character Voices are free, ready-made voices with names and personalities, such as Ahmed, Priya, Ivan and Natasha.
- Use the search box to find a voice by name.
- Good uses: cartoon stories, explainer videos, dialogue between two characters.
- For a conversation, split the script into parts and give each part a different character.

7. Browser Voices (offline engine)

- These voices come from your own device, so they work without internet and your text stays on your device.
- If you see "No device voices found":
 1. Use Chrome or Edge on desktop.

2. On Windows, go to Settings > Time & Language > Speech, and add voices.
3. Reload the page.
4. Or simply use Character Voices instead.

8. Download and use your MP3

- Files download as MP3, which works on YouTube, TikTok, Facebook, WhatsApp, CapCut and Canva.
- Name the file clearly, for example `episode-01-urdu.mp3`.
- Add the MP3 to your video editor and line it up with your visuals.

9. Lip-Sync

1. Generate or upload your audio.
2. Upload a clear, front-facing photo or video of the face.
3. Press **Lip-Sync** and wait for processing.
4. Preview, then download the video.

Best results: good lighting, face looking at the camera, mouth not covered, audio under [60] seconds. Use only faces you have the right to use.

10. Voice Cloning (Premium)

1. Upgrade to Premium.
2. Tick the consent box confirming the voice is yours or you have written permission.
3. Record or upload 1 to 3 minutes of clean speech in a quiet room.
4. Read the consent line shown on screen in the same voice.
5. Wait for the voice model to be created, then select it like any other voice.
6. Delete your voice model anytime from your account settings.

11. Tips for better Urdu voiceovers

- Write in proper Urdu script for the Urdu voice. Roman Urdu often sounds wrong.
- Use commas and full stops (، .) to create natural pauses.
- Write numbers in words when pronunciation matters, for example "پچیس" instead of 25.
- Spell English brand names in Urdu script if the voice mispronounces them.
- Keep sentences short for news and educational content.

12. Troubleshooting

Problem	Fix
No device voices found	Use Chrome or Edge, add voices in system speech settings, or use Character Voices
No sound on Preview	Check device volume, unmute the browser tab, try headphones
Wrong pronunciation	Check language and voice match; rewrite the word phonetically
MP3 not downloading	Allow downloads for the site; try another browser
Page slow or stuck	Reload, shorten the text, close other heavy tabs
Lip-sync looks unnatural	Use a clearer front-facing face and shorter audio

13. FAQ

Is it really free? Yes. Text-to-speech, character voices and MP3 download are free. Voice cloning is Premium.

Can I use the audio on YouTube and earn money? Yes, under section 8 of the Terms, as long as your content follows the acceptable use rules.

Do I need an API key? No.

Can I clone a famous person's voice? No. Only your own voice, or one with written permission.

Does it work offline? Browser Voices work offline. Character Voices and premium features need internet.

How do I report misuse? Email [abuse email] with the link or file.
